Latex Balloon Base

Build the balloon pedestal from the base up. Air inflate two 5" latex balloons to 5" and tie together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Repeat this step to create a second cluster. Nest the clusters together.

350 Latex Twistee

Air inflate a 350 Twistee approximately 18" long and tie off neck. Secure to the base by tying the un-inflated portion around the nested clusters of the base.

Standard Foil Balloon

Air inflate the standard foil balloon and tie an un-inflated 350 to the neck. Attach the standard foil to the base by tying the un-inflated 350 to the top of the inflated 350.

Latex Balloon Collar

Create a 3" cluster using the steps above. Slip the cluster between the Standard foil and the top of the inflated 350. Twist the 3" balloons around each other to secure in place.
