Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

When using air to inflate the primary balloon, omit the heavy weight. Instead attach a hang tab to the top of the balloon and hang it with curling ribbon or monofilament.

5" Latex Collar

Air inflate two 5" balloons and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Place the cluster under the helium filled balloon and twist the balloons around the tail. Push up on the cluster to secure it as closely to the bottom of the balloon as possible.

260 Latex Curls

Fully air inflate and deflate the 260. Attach the tip of the 260 to a cylindrical object like a pipe or wrapping paper tube with a Clip-n-Weight™. Wrap the 260 smoothly around the tube making sure not to twist it. Re-inflate, slip it off the cylinder and tie. Create two additional curls and tie all three together at the neck. Slip them through the 5" balloon cluster and pull them down so they are locked in place under the cluster as shown.
