**LINK-O-LOON® PRO**  
BALLOON DECORATING SYSTEM

### INTRODUCTION

The LINK-O-LOON® chain is perhaps the most simple of all LINK-O-LOON® designs. When helium-filled, it makes a column; when air-filled, it can be suspended from the ceiling to create a chain. This recipe will lead you through steps for making a wall or backdrop with air from a series of chains that are joined and designed to hang from the ceiling with Clik-Clik MagMover™ magnets. Easy!

### APPLICATIONS

- Stage Backdrop
- Main Table Arch
- Entrance Décor
- Dance Floor Décor

### MATERIALS & EQUIPMENT

- 49 x 12" (30cm) LINK-O-LOON® Streamers printed latex (#720801)
- 112 x 5" (12cm) white latex
- 2-3 Clik-Clik™ Magnets and MagMover™
- Balloon Sizer

### STEP-BY-STEP

1. Air fill two 5" (12cm) white latex and tie the necks together to make a duplet. Create 12 duplets and set aside.
2. Air fill chains of 12" LINK-O-LOON® as follows and add a duplet of 5" white latex to each end of every chain:
  - two Crystal Red Streamers chains of four sized to 11" (28cm)
  - two Crystal Yellow Streamers chains of four sized to 11" (28cm)
  - two Crystal Blue Streamers chains of four sized to 11" (28cm)
  - five chains of five with sized to 11" (28cm) colors in this order: Orange, Green, Violet, Green, Orange
3. Join the 5" (12cm) duplet at the end of a Red chain of four to the duplet at the end of the assorted color chain. Add each of the assorted chains in the same color placement onto the Red chain, wrapping the duplet around the knots of the Red chain.
4. Add a Yellow chain of four by wrapping the duplet at the one end between the Orange and Green LINK-O-LOON®. Continue securing the Yellow chain in place by wrapping a duplet to the two chains, with one in front and one in back to hold the wall flat. At the end, wrap the final Yellow chain duplet to the joined Orange and Green assorted chain.
5. Continue to add the solid color chains to the assorted chains in the same technique making sure colors are aligned as shown. When complete, adjust the duplets if needed to make the wall lie flat and smooth. It can now be suspended from the ceiling with Clik-Clik MagMover™ and Clik Magnets or placed and secured against a wall.

### CONCLUSION

This design can be created in prints, solid colors, contrasting colors or, as shown in this design, with color variations that flow like a rainbow from one to another.
