

# Helium Conservation Education: Using Magic Balloon Wands for 18" Air Inflation

## STEP 1:

You will need the following items for this project:

- Fully inflated 18" balloon.

- Magic Balloon Wand.

## STEP 2:

First, insert the tail through the center of the Magic Balloon Wand coil. Pull tightly on the tail to compress the coil. This will keep the balloon tight.

## STEP 3:

Next, pull tightly and secure the tail in the top clip of the Magic Balloon Wand.

# Helium Conservation Education: Using Magic Balloon Wands for 18" Air Inflation

## STEP 4:

Wrap the remaining tail around the wand and secure it in the bottom clip with each pass to keep the balloon tightly secured.

## FINISH:

Air-Inflated 18" balloons can be sold individually, or added to plush animals, potted plants, or floral bouquets for added value.
