## 5" Latex Base & Collar

Inflate two 5" balloons and tie them together to form a duplet.

Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Repeat to create a second cluster inflated to 4". Twist the two clusters together to form the base.

Adjust the clusters until they are neatly nested together.

Repeat these steps to create the balloon collar.

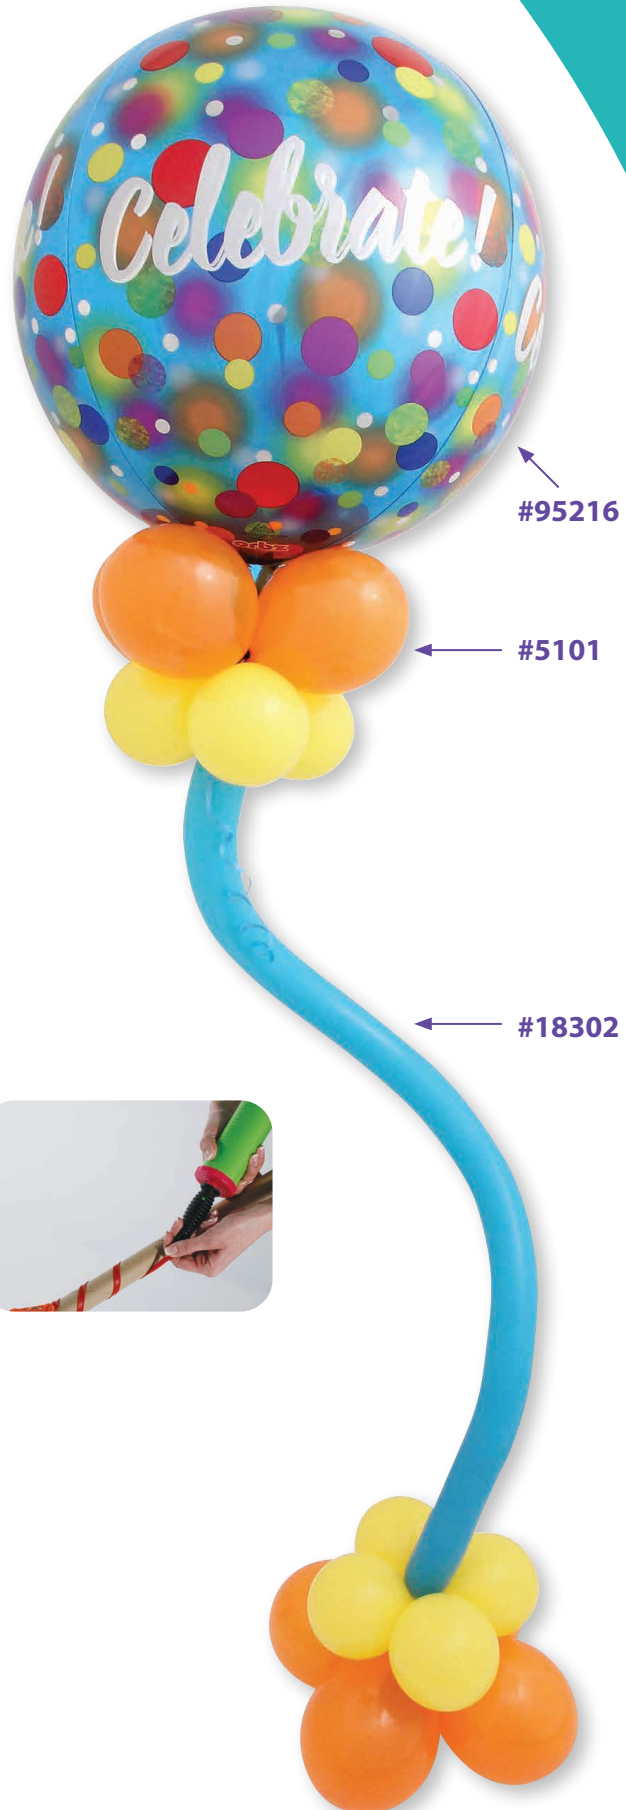

## 260 Latex Curl

Fully air inflate and deflate the 260. Attach the tip of the 260 to a cylindrical object like a pipe or wrapping paper tube with a Clip-n-Weight™. Wrap the 260 smoothly around the tube making sure not to twist it. Re-inflate the 260 leaving 3" uninflated at the tip. Slip it off the cylinder and tie. Tie the heavy weight to the uninflated tip and cover it using the 5" latex balloon base.

## Primary Balloon

Inflate the primary balloon and attach a 2' length of curling ribbon. Slip the tail of the balloon through the 5" latex collar. Nest the collar as closely to the bottom of the balloon as possible. Tie the curling ribbon to the neck of the 260. Use scissors to curl the excess ribbon.

**WARNING: CHOKING HAZARD** Children under 8 years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once.
