Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

When using air to inflate the primary balloon, omit the heavy weight. Instead attach a hang tab to the top of the balloon and hang it with curling ribbon or monofilament.

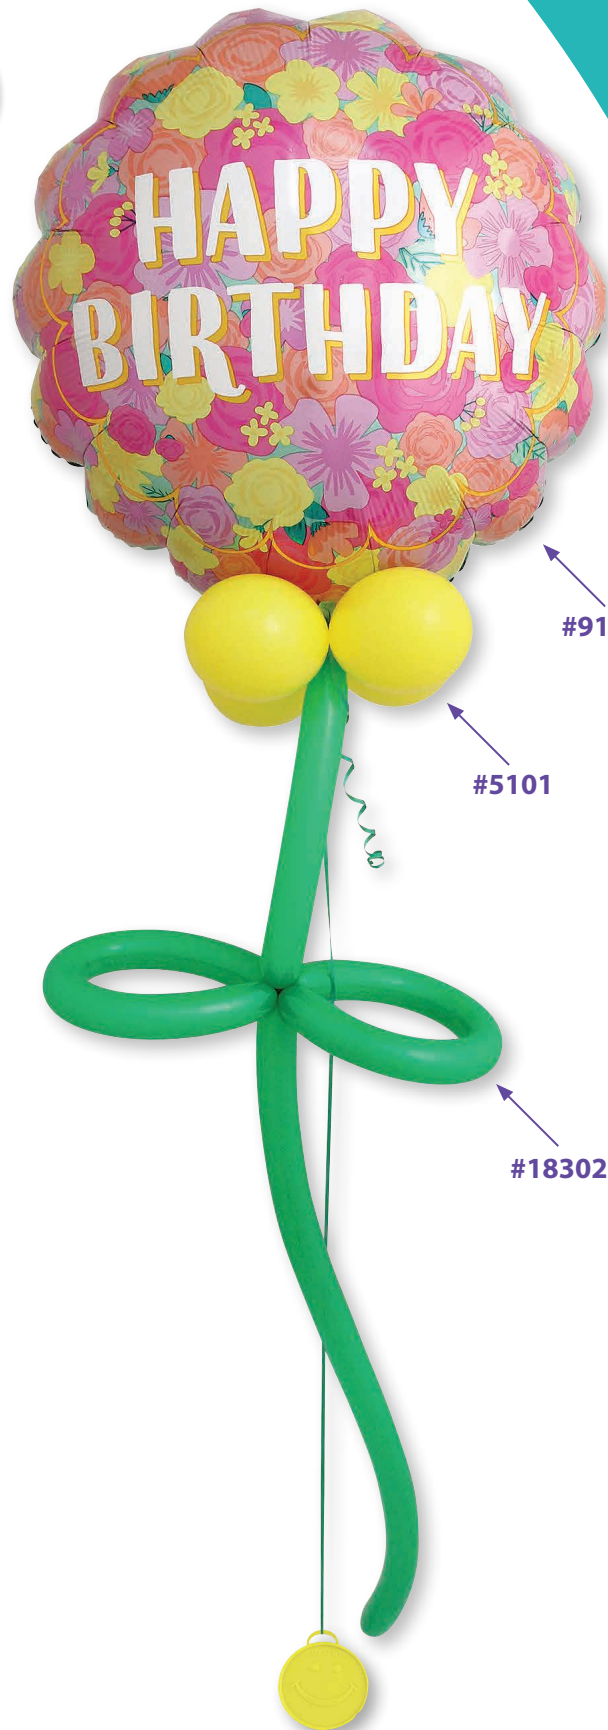

5" Latex Collar

Air inflate two 5" balloons and tie together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Place the cluster under the helium filled balloon and twist two balloons around each other. Push up on the cluster to secure it as closely to the bottom of the balloon as possible.

260 Latex Balloons

Stem - Fully air inflate a 260. Straighten the balloon by hand. Tie an uninflated 260 to the neck and use it to attach the stem directly under the 5" balloon cluster.

Leaves - Fully air inflate a 260. Tie the ends together to make a ring. Squeeze the ring in half, making sure the knot is in the middle. Twist the balloon to form a figure 8. Twist the figure 8 onto the stem approximately one foot below the balloon cluster.

WARNING:
CHOKING HAZARD

Children under 8 years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once.
