### Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

*When using air to inflate the primary balloon, omit the heavy weight. Instead attach a hang tab to the top of the balloon and hang it with curling ribbon or monofilament.*

### 5" Latex Collar

Air inflate two 5" balloons and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Place the cluster under the helium filled balloon and twist the balloons around the tail. Push up on the cluster to secure it as closely to the bottom of the balloon as possible.

### 260 Latex Gift Bow

Air inflate two 260 balloons, leaving a 1/2" tip. Tie the two balloons together at the neck and tip to create a large ring. Place the ring under the 5" cluster and pull up so that it rests between the balloons in the cluster. Wrap the 260s tightly around the helium filled balloon and twist to secure. Bring the top of the remaining loop down and twist in the center, to create the loops of the bow.
