

# LOOP-D-LOO COLLAR

**Build Time 8 minutes**

QTY	ITEM	DESCRIPTION
1	96969	38" Sweet Bee
1	18302	260 Classic Twistee Assortment (3 needed)
1	5101	5" Standard Latex Assortment (3 needed)
1	1141	3/16" Black Curling Ribbon
1	1653	Heavy Weight

### Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

*When using air to inflate the primary balloon, omit the heavy weight. Instead attach a hang tab to the top of the balloon and hang it with curling ribbon or monofilament.*

### 260 Latex Collar

Fully air inflate a 260 balloon, then release a tiny bit of air to make the balloon more pliable. Tie the ends of the balloon together to create a ring. Repeat two more times for a total of three rings.

Twist the rings in half, making sure the knot rests in the middle, to create a figure 8. Repeat with the other two rings.

Twist all three figure 8s together at the center, creating a six-loop cluster.

Place this cluster under the helium filled balloon and twist two balloons around each other to secure it as closely to the bottom of the balloon as possible.

### 5" Latex Balloons

Fully air inflate three 5" latex balloons and tie together to form a triplet. Slip the triplet in between the 260 collar.

**WARNING:** Children under 8 years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once.

**Defy Gravity!**

### Save helium!

Fill the primary balloon with air. Hang it using an adhesive tab and curling ribbon. No weight needed!
