## #91240

Air inflate the foil balloon. Slide the tail through one of the holes in the balloon cup and secure it with clear tape. Slip an uninflated 260 Twistee through the two remaining holes in the cup.

## #1537

Assemble the rest of the Balloon Display Tower. Fill the base with water to provide stability. Extend the pole four feet.

## #5256

Air inflate two latex balloons to 5" and tie together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Create a second cluster. Twist the two clusters together to form the double collar. Slip the collar onto the pole. Attach the foil balloon to the top of the tower and nest the double collar snugly under it. Slip the uninflated 260 through the double collar and tie it.

## #18302

Fully air inflate a 260, then release the air. Secure the tip to the top of a cylindrical object using a Clip-n-Weight®. Tightly wrap the 260 around the cylinder, refill with air and tie the neck. Tie an uninflated 260 to the neck. Repeat the steps to create a second curl. Attach each curl to the double collar with the uninflated 260.

## Curling Ribbon

Cut eight 6' lengths of different colors of curling ribbon. Fold them in half and slip them through the double collar.
