Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

When using air to inflate the primary balloon, omit the heavy weight. Instead attach a hang tab to the top of the balloon and hang it with curling ribbon or monofilament.

5" Latex Collar

Fully air inflate two 5" balloons and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Place the cluster under the helium filled balloon and twist the balloons around the tail. Push up on the cluster to secure it as closely to the bottom of the balloon as possible.

260 Latex Loop

Air inflate a 260 leaving 4" uninflated at the tip. Tie the neck to the tip to create a loop. Tie the loop into the balloon collar using the uninflated excess.

Defy Gravity!

Save helium!
Fill the primary balloon with air. Hang it using an adhesive tab and curling ribbon. No weight needed!

WARNING: CHOKING HAZARD Children under 8 years can choke or suffocate on uninflated or broken balloons. Adult supervision required. Keep uninflated balloons from children. Discard broken balloons at once.
