#96997 / #86077

Helium inflate and attach pink curling ribbon.

#12976

Add Ultra Hi-Float™ and helium inflate. Attach pink curling ribbon.

#5402

Fully air inflate two 5" white latex balloons and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Use these steps to create two additional 5" clusters. Slip the clusters under the 11" latex balloons and wrap the curling ribbon around them to secure them in place.

Repeat the steps above to create one 3", 4" and 5" cluster. Stack the clusters together with the largest on the bottom. Use an uninflated 260 to secure the three clusters together. Slip all helium inflated balloons through the clusters and tie them to the heavy weight.

#18239

Fully air inflate 260 and shape into a ribbon, securing the intersection with a balloon bond. Tie knot of the 260 into center of smallest cluster as shown.

#1126 / #1139 / #1127

Wrap strands of curling ribbon into the base clusters as shown.
