## Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

When using air to inflate the primary balloon, omit the heavy weight. Instead attach a hang tab to the top of the balloon and hang it with curling ribbon or monofilament.

## 5" Latex Clusters

Fully air inflate two 5" balloons and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Repeat to create a second cluster.

## 260 Latex Ring

Fully air inflate a 260. Tie the ends together to make a ring. Squeeze the ring in half, making sure the knot is in the middle. Twist the balloon to form a figure 8.

Add a cluster above and below the figure 8 and tie everything together with an uninflated 260 . Wrap the weighted curling ribbon through the cluster and push up on the cluster to secure it as closely to the bottom of the helium filled balloon as possible.

## Save helium!

Fill the primary balloon with air. Hang it using an adhesive tab and curling ribbon.
No weight needed!
