Inflate the primary balloon, tie with curling ribbon and attach weight.

#18296 / #5451

Fully air-inflate a 260. Tie the ends together to make a ring. Squeeze the ring in half, making sure the knot is in the middle. Twist the balloon to form a figure 8.

Fully air-inflate and deflate a 260. Attach the tip of the 260 to a cylindrical object like a pipe or wrapping paper tube with a Clipping Weight (see below). Wrap the 260 smoothly around the tube making sure not to twist it. Re-inflate, slip it off the cylinder and tie. Create an additional curl and tie both together at the neck.

Twist the curls around the middle of the figure 8 to secure them together.

Finish the bow by adding a 5" latex balloon, inflated to 2". Tie it into the center to form the knot of the bow.

Place the bow under the helium filled balloon. Wrap the curling ribbon around the knot of the bow. Push up on the bow while pulling down on the curling ribbon to nest it as closely as possible to the bottom of the balloon.
