#81336

Inflate the primary balloon, tie with curling ribbon and attach weight.

Small Present #5453 / #18295

Air-inflate two 5" balloons to equal size and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster.

Repeat steps to create another cluster. Twist the two clusters together to create a balloon cube.

Air-inflate a 260. Wrap it around the balloon cube and twist to secure it. If there is any excess, snip the ends and tie them in a knot to prevent air from leaking out.

To make the bow, create a Twistee Star (see below) and tuck it underneath the wrapped 260.

Twistee Star

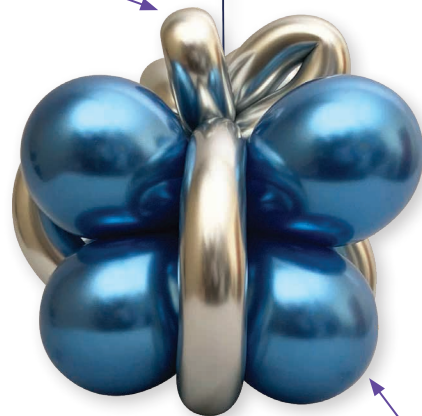

Fully air-inflate a 260. Tie the ends together to make a ring. Squeeze the ring in half, making sure the knot is in the middle. Twist the balloon to form a figure 8. Squeeze the ends of the figure 8 into the center (see image). Twist everything together in the center to create the four smaller loops of the star.

Slip the curling ribbon from the primary balloon through the present to cover the weight.

#95886

Inflate the primary balloon, tie with curling ribbon and attach weight.

Large Present

#12557 / #18296

Create the balloon cubes with the same steps above but use 11" latex. For the 260 wrap you will need to use two 260s.

For the bow use the instructions for making a Bird's Nest collar (instructions below).

Bird's Nest Collar

Fully air inflate a 260 balloon, then release a tiny bit of air to make the balloon more pliable. Tie the ends of the balloon together to create a ring. Repeat to make a second ring.

Twist each ring in half, making sure the knot rests in the middle, to create a figure 8.

Twist the figure 8s together at the center, creating a four-loop collar. Tuck it underneath the wrapped 260.

Slip the curling ribbon from the primary balloon through the present to cover the weight.
