### Primary Balloon

Inflate the primary balloon, tie with curling ribbon and attach weight.

### 5" Latex Collar & Base

Air inflate two 5" balloons and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Place the cluster under the helium filled balloon and twist the balloons around the tail. Push up on the cluster to secure it as closely to the bottom of the balloon as possible. Create another cluster inflated to a smaller size and nest below the first cluster as shown.

Air inflate two more clusters and add to the bottom of the ribbon just above the weight.

### Latex Flower

Air inflate two 5" balloons and tie together to form a duplet. Repeat to create a second duplet. Twist the two duplets together. Tie in another balloon to create a five petal flower. Create a final duplet and size balloons to 2". Slide into the middle of the petals and center on each side of the flower. Wrap the ribbon around the flower to hold it in place.
