1	1796	Heavy Smile Face Weight (1 needed)

#90802 / #88146

#88087 / #88123

Helium inflate and attach curling ribbon.

#11901

Add Ultra Hi-Float™, helium inflate and attach curling ribbon. Arrange foil and latex bouquet to match the picture and secure them to the heavy weight.

#18152

Four-Loop 160 Collar: Air inflate 160 and knot ends together forming a circle. Fold circle in half. Twist the knot into the fold, forming a figure-8. Push both loops into the knotted center and twist to make a four-loop cluster. Place under 11" latex and twist around curling ribbon to secure.

Base: Air inflate two latex balloons to 6" and tie them together to form a duplet. Repeat to create a second duplet. Twist the two duplets together to create a four-balloon cluster. Use these steps to create second cluster inflated to 8". Twist the clusters together to form the eight-balloon base.

#11995

Two-Loop 160 Burst: Air inflate 160 and knot ends together forming a circle. Fold circle in half. Twist the knot into the fold, forming a figure-8. Make 2 or more. Twist 160s together to form the burst. Tie into the base using an uninflated 160.

Slide the weighted balloon bouquet through the base and hide the weight underneath.
