#97622

Inflate the primary balloon, tie with curling ribbon and attach weight.

#18296

Fully air-inflate the 260. Fold it in half and twist it together 5" from the ends. This will create a large loop. Bring the middle of the loop down and twist it in. This makes the two small loops of the bow.

#5451

Inflate a 5" balloon to the size of a tennis ball. Grip the balloon with both hands and hide the knot by twisting it several times. The balloon should now have two equal size round segments. Slip the balloon into the center of the 260 to create the knot of the bow.

Place the bow under the helium filled balloon.
Wrap the curling ribbon around the knot of the bow to secure it.
