#91182

Inflate the primary balloon, tie with curling ribbon and attach weight.

#18514 / #18266

Upper Wings - Air-inflate a 260, leaving 4" uninflated at the end. Tie the ends together to make a ring. Trim off the excess. Squeeze the ring in half, making sure the knot is in the middle. Twist the balloon to form a figure 8.

Lower Wings - Repeat the steps above but leave 8" uninflated at the end.

Twist the two balloons together and arrange so the smaller wings are on the bottom.

Body - Air-inflate a 260, leaving 4" uninflated at the end. Leave 1" uninflated at the neck and tie the knot.

Starting at the neck, twist two small segments approximately 2" long. Fold them over and twist them into the rest of the balloon to make the head. Push the knot through the two segments of the head to lock it in place.

Wrap the 260 tightly around the wings and twist it into the head. Cut the end and carefully deflate it. Tie a knot to keep the balloon from deflating, wrap it around the head two times and trim off the remaining excess.

Slip the curling ribbon through the finished butterfly 8" - 10" below the foil balloon.
