Inflate the primary balloon, tie with curling ribbon and attach weight.

#5436 / #18515

Fully inflate and release the air from a 260 to make it more pliable. Reinflate the balloon leaving the last two 2" uninflated on the tip. Tie a knot in the neck leaving 1" of excess.

Measure 5" from the knot and twist the balloon to look like a sausage. Fold this portion over and twist the knot into the 260 where it meets the balloon (Image 1). Repeat this step 2 more times. The balloon should have three segments in the shape of a "Y" (Image 2).

Fold the end of the first segment into the middle knot (Image 3) and twist them around each other to hold their shape. Repeat this step with the other two segments.

Air inflate a 5" latex balloon to 2" and tie it into the center of the flower.
